Kolkata, West Bengal, India

Education

Techno India University — Kolkata, India
Bachelor of Technology in Electronics and Communication Engineering; CGPA: 8.00 — *Aug 2024 – July 2028*

Bhimeswari Uchcha Sikshayatan (H.S) — Bhagwanpur, Purba Medinipur
Class XII – WBCHSE; Percentage: 70.2% — *2022 – 2024*

Experience

App Development Intern — Apr 2026 – Jul 2026
CURAA

- Built and shipped mobile application features end-to-end, from implementation through debugging and testing, for a live production app
- Partnered with a cross-functional development team across the full software development lifecycle (SDLC), from requirements to release
- Applied software engineering best practices (code reviews, version control, structured testing) to keep application components reliable and maintainable

Software Development Intern — Mar 2025 – May 2025
Cognifyz Technologies — *Remote*

- Solved real-world software engineering problems in Java using structured, test-driven problem-solving methodologies
- Debugged, tested, and optimized existing codebases, improving reliability and runtime performance following industry best practices
- Collaborated with cross-functional teams using Git for version control and actively participated in peer code reviews

Projects

Expense Tracker Android Application | *Java, Spring Boot, MySQL, REST API, Retrofit* — GitHub

- Developed a personal finance Android application for tracking daily expenses and income with secure user authentication
- Implemented Spring Boot REST APIs and integrated Retrofit for communication between the Android application and backend
- Integrated MySQL for user-specific financial data and implemented net balance calculation and swipe-to-delete functionality

Heart Disease Classifier | *Python, Scikit-learn, XGBoost, Pandas* — GitHub

- Built an end-to-end ML pipeline on the UCI Cleveland Heart Disease dataset to classify presence of heart disease
- Trained and benchmarked Logistic Regression, Random Forest, and XGBoost, reaching ~85% test accuracy and 0.92 AUC-ROC with Random Forest
- Engineered a modular pipeline (preprocessing, training, evaluation, prediction) with automated ROC and feature-importance reporting

Technical Skills

Languages: Java, Python, JavaScript, TypeScript, HTML, CSS, SQL, MySQL
Frameworks & Libraries: React, React Native, Redux Toolkit, Spring Boot, Node.js, Next.js, Scikit-learn, Pandas, XGBoost
Developer Tools: Git, GitHub, Android Studio, VS Code
Computer Science: Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, DBMS, Computer Networks

Achievements & Leadership

LeetCode Knight: Achieved Knight ranking with 70+ DSA problems solved, demonstrating strong algorithmic problem-solving

Naukri Campus Young Turks 2025: Ranked in the top 1 percentile nationwide in India's skill assessment contest

Gen AI Study Jams: Placed in the Top 15 at Techno India University's inter-college AI/ML competition

Open Source Contributor: Active GitHub contributor with public repositories and collaborative projects
